

# Leave a Mark at MathCo

A place to solve  
high-impact problems!

## About Us

TheMathCompany or MathCo® is a global Enterprise AI and Analytics company trusted for data-driven decision-making by leading Fortune 500 and Global 2000 enterprises. Founded in 2016, MathCo builds custom AI and advanced analytics solutions focused on enterprise problem-solving through its innovative hybrid model. NucliOS, MathCo's proprietary platform with pre-built workflows and reusable plug-and-play modules, enables the vision of connected intelligence at a lower TCO.

For our employees, we foster an open, transparent, and collaborative culture with no barriers, making MathCo a great place to work. We provide exciting growth opportunities, value capabilities, and attitude over experience, enabling the Mathemagicians to 'Leave a Mark'.

# We Stay True to Our MathCo BASICS – Our Cultural Tenets

## Building Relationships

We want to build deep relationships with our customers so that they see us as true partners, and with our people, create a holistic work culture where everyone feels like they belong.

## Ambition & Hunger

Ambition and hunger drive us to do more in every endeavor we undertake —be it in where we want to go as a company or what we want to achieve in our careers as individuals.

## Simplicity

We think deeply about how we can simplify the most complex solutions and are constantly working towards becoming the world's best problem-solvers.

## Individuals Matter

This idea is core to us. Whether they are clients who have their multiple challenges, or our people who have their own goals, ambitions, and needs, every individual is special.

## Creating Elevated Experiences

The elevated experience we create for our clients has led to them wanting to work with us again. Similarly, we strive to ensure that the experiences we provide to employees, at various touchpoints in the organization, are elevated in thought and action.

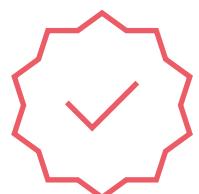

## Speed

While we have the patience to reach the ultimate end goal, the need for speed is real — be it in using the tech

# Limitless Learning. Limitless Possibilities
